

Elements Report

Use the Royal Society of Chemistry Periodic Table: <https://www.rsc.org/periodic-table>

You can do this by hand, on paper, or if you wish, you can create a Word or PowerPoint document. You may include pictures if you want to, but please make sure that your work is complete.

You will be asked to upload onto Teams at the end of the two weeks by your class teacher.

You need to:

1. Choose 5 elements – 2 non-metals and 3 metals.
2. For each element you need to write down some facts on:
 - a. Uses and properties:
 - i. Appearance
 - ii. Uses
 - iii. Abundance
 - b. History
3. You will find all this information on the RSC periodic table website.
